
Golf Club Terme di Saturnia

The mild climate of the Tuscan Maremma and the presence of warm thermal waters make the Terme di Saturnia golf course the ideal place to play all year round.

Respectful of the natural conformation of the land, the course is the only one in Italy to be designed by Californian architect Ronald Fream of the GolfPlan Studio. The course was designed in strict compliance with the rules for safeguarding local nature: Terme di Saturnia Golf has obtained the prestigious GEO Certification, one of the most sought-after worldwide.

Golf course and philosophy

- A championship course of 6,316 metres on 70 hectares in the Maremma countryside, surrounded by the colours of nature that change with the seasons. Each hole has its own identity and, a well-known feature of all courses with a special character, the course is immediately memorable: once the 18 holes have been completed, it is difficult to forget the lakes, streams, large bunkers carved into the fairways, wide, undulating greens and landing areas that require intelligence and precision when choosing which club to use at the start.
- It is only thanks to respect for the rules for safeguarding local nature that it has been possible to build such a spectacular route, where it is easy to encounter, in the early hours of the morning, roe deer, porcupines, hares, pheasants and many species of birds that populate the Maremma.
